

Business Scenario and Use-Cases

Name: Wong, Jordan

Student #: 14753180

Topic: concert

Write a single paragraph of 4 to 5 sentences that describes a business scenario for your topic.

The business for this case would be a function spot which gives smaller artists an opportunity to host events to their fans. It is solely for a more 'budget' version for upcoming artists who might not have the funds right now to host something at a big/popular location like Qudos Arena. This business will have a very thorough and proper online system/program which will let artists customise costs, equipment, numbers, etc.

Use-Cases for a Computer Program

List 5 use-cases for a computer program that will serve needs of the business described in your scenario. Write a single complete sentence for each use-case.

- Allow the artist / host to select days and book dates that are open and available.
- Allow the artist / host to select what equipment they want / need in order for their performance (e.g. drum kit, piano, speakers, microphone).
- Allow the normal users / fans to easily track upcoming performances in the program.
- Allow the artist / host to easily view budget including initial costs for equipment and booking spot + profits and more from sold tickets to fans.
- Allow the user to pay over the program or show interest with a 'interested' button which will then help the artist / hosts grasp numbers and more.

Business Scenario and Use-Cases

Name: Lukins, Daniel

Student #: 14792081

Topic: concert

Write a single paragraph of 4 to 5 sentences that describes a business scenario for your topic.

Taylor Swift is holding a concert featuring various other artists. To manage this concert, a program will be created for the concert technical team. It will allow the concert team to view the order of songs to be played, which tickets are available, when certain sound effects to be played, etc. As Taylor Swift is a popular artist, a large scale of tickets need to be managed. The order of songs to be played and when sound effects occur will be used in the concert.

Use-Cases for a Computer Program

List 5 use-cases for a computer program that will serve needs of the business described in your scenario. Write a single complete sentence for each use-case.

- The program will display a visual indication of which seats are available or unavailable.
- The program will update the seating availability as tickets are bought.
- The program will allow the user to add, remove or modify the song order.
- The program will allow the user to view current money made from the ticket sales.
- The program will allow the user to modify details and of different ticket types.
